HOW TO COMPLETE THIS DOCUMENT

This document is an interactive PDF form. All vendor input is entered directly into the form fields, while the specification text and pre-filled cells are locked. We recommend completing the form in Adobe Acrobat Reader (free), as some browser viewers and Apple Preview may not save all field types correctly.

Vendors should complete each part of the document as follows:

Compliance columns (Section 3): Select one code per requirement from the drop-down list (FC, PC, RD, CU or NC), as defined in Section 2. Use the adjacent comment field to describe how the requirement is met. For RD, state the planned release date. For CU, state estimated hours and cost.

Gap Analysis Worksheet (Section 4): Complete one row for each Level 1 requirement marked PC, RD or CU, referencing its requirement ID. If additional rows are needed, attach an appendix using the same column structure.

Commercial tables (Section 5): Enter all amounts in the grey-shaded cells, excluding Swedish VAT and using one currency throughout. Where a cell does not apply to your delivery model, enter "N/A" rather than leaving it blank.

Vendor details and declarations (Section 6): Complete all vendor detail fields and tick each regulatory declaration your organisation can confirm.

Signature: Enter the name, title and date of the authorized representative, then sign in the signature area using the Fill & Sign tool in Adobe Acrobat Reader or a qualified digital signature.

Longer answers: Text fields accept more text than is visible and will scroll. Where a response requires more detail, refer to a numbered appendix (e.g. "See Appendix A, FN-DIS-01") and include it with your submission.

Submission: Save the completed file and return it as a PDF to olle@weride.eu no later than the Proposal Submission deadline stated on the cover page. Please do not print and scan the form, as responses are processed digitally.

1. EXECUTIVE SUMMARY & ARCHITECTURAL PHILOSOPHY

Weride Sweden AB is procuring an enterprise cloud ride-hailing and taxi dispatch software platform. To maximize cost efficiency and ensure a rapid time-to-market, the platform requirements are divided into two distinct delivery tiers:

1. **Level 1: Baseline Core (Launch MVP):** Core functional modules and mandatory regulatory capabilities necessary for a seamless, legally compliant commercial launch with controlled initial TCO (Total Cost of Ownership).
2. **Level 2: Expansion Package (Next Level Upgrade):** Advanced optimization tools, AI features, secondary partner integrations, and enhancement modules planned for post-launch investment.

1.1 Delivery Pathways

- **Option A:** COTS / White-Label Mapping + Customization Delta: Vendors map standard software against this specification, indicating any custom effort (*CU*) required to meet Level 1 compliance.
- **Option B:** Fully Custom Platform Build: Development agencies proposing a custom engineering build tailored to these specifications.

1.2 Vendor Evaluation Pathways (Dual-Track Approach)

Bidders may respond under one or both of the following delivery models:

1. **Option A: White-Label / COTS Mapping + Customization Delta**
Vendors with an existing off-the-shelf platform must map their current functional capabilities against this document. Where features are not fully supported out-of-the-box, the vendor must specify the exact customization effort (engineering days, cost, and timeline) required to deliver full compliance.
2. **Option B: Fully Custom Build**
Software development agencies proposing a fully tailored, proprietary system build based on the specifications in this document.

1.3 Scope of Supply & System Ecosystem

The delivered solution must comprise the following interconnected sub-systems:

- **Web Admin & Master Dispatch Console:** Real-time fleet tracking, automated/manual dispatching, zone management, dynamic pricing, and regulatory human oversight.

- **Driver Mobile Application (iOS & Android):** Offer cards, background GPS tracking, navigation handoff, in-app messaging, helpdesk button, earnings dashboard, and algorithmic disclosures.
- **Passenger Mobile Application (iOS & Android):** Upfront pricing, live tracking, Swish/Card digital payments, voucher redemptions, in-app messaging, and helpdesk support.
- **Hotel Concierge & Reception Dashboard:** Dedicated web portal allowing hotel staff and receptionists to book and manage rides for guests seamlessly.
- **Supplier & Carrier Portal:** Portal for third-party fleet operators and carriers to manage drivers, vehicles, documentation, and payout statements.
- **OTA & Partner Integration Hub:** Open APIs, webhooks, and flight tracking integration (e.g., FlightAware/Flightradar24) for automated flight delay adjustments and partner booking sync.
- **Regulatory, Tax & Accounting Module:** EU Platform Work Directive (2024/2831) compliance, EU DAC 7 tax ledger, Skatteverket digital audit controls (Prop. 2017/18:239), split VAT engine (6% transport / 25% delivery), and Fortnox accounting export.
- **Microsoft 365 Enterprise Ecosystem Integration:** Microsoft Entra ID Single Sign-On (SSO), Graph API Outlook Calendar booking sync, Power BI operational pipelines, and Microsoft Teams emergency alerts.

2. VENDOR COMPLIANCE & CUSTOMIZATION MAPPING SCALE

Vendors must evaluate each listed requirement using the following standard coding scale and provide detailed comments:

FC (Fully Compliant - Out of the Box): Supported natively in the standard current production software release.

PC (Partially Compliant - Requires Configuration/Minor Customization): Supported through configuration, minor modification, or standard third-party plugin integration.

RD (Roadmap Feature): Under active development; vendor must state exact planned release date.

CU (Custom Development Required): Capability does not exist out-of-the-box but can be built specifically for Weride AB (vendor must provide estimated development hours/cost).

NC (Non-Compliant): Feature is not supported and cannot be provided by the vendor.

2.1 Implementation Level

Baseline Core - L1: Mandatory for initial system deployment and legal operation.

Expansion Package - L2: Next-stage enhancement to be priced separately as an add-on module.

3. CONSOLIDATED SYSTEM REQUIREMENTS MATRIX

MODULE A: Core Functional System (High-Level / General)

ID	Requirement Area	Tier	Capability Description	Compliance (FC/PC/RD/CU/NC)	Vendor Delta / Comments
FN-BKG-01	Multi-Channel Booking Intake	L1	Support ride requests from mobile apps, web dispatch console, hotel portals, and partner (OTA) APIs.	☐	
FN-BKG-02	Dynamic Upfront Fare Calculation	L1	Upfront pricing engine supporting base rates, distance/time pricing, zone rates, and surge multipliers.	☐	
FN-DIS-01	Automated & Dynamic Dispatching	L1	Algorithmic driver matching based on driver proximity, vehicle class, and zone queue position.	☐	
FN-DIS-02	Live Dispatch Console & Map View	L1	Real-time map rendering active vehicles, trip statuses, and manual dispatcher override capabilities. Trip logs with arrival/finished time and lat/lon position.	☐	
FN-DRV-01	Driver Mobile Application	L1	Native/cross-platform app featuring trip offer cards (marketplace), execution workflow, and earnings summaries.	☐	
FN-DRV-02	Navigation Handoff	L1	Direct one-tap handoff from driver app to external/built in navigation.	☐	
FN-PAS-01	Passenger Mobile App	L1	Native/cross-platform app supporting instant/advance bookings, live ETA tracking, and driver/vehicle details.	☐	

ID	Requirement Area	Tier	Capability Description	Compliance (FC/PC/RD/CU/NC)	Vendor Delta / Comments
FN-PAS-02	Swedish Digital Payments	L1	In-app credit/debit card tokenization (Stripe/Adyen) and native Swedish Swish e-commerce payment API.		
FN-COM-01	In-App Messaging & Masked Calling	L1	Centralized cross-platform text messaging and proxy phone number masking between rider, driver, and dispatcher.		
FN-HTL-01	Hotel Concierge Portal	L1	Simplified web portal for hotel/corporate staff to order guest rides, track ETAs, and charge to room or corporate accounts.		
FN-SUP-01	Fleet Carrier Portal	L1	Web portal for third-party fleet owners (carriers) to manage sub-fleets, driver documentation, and payouts.		
FN-VOU-01	Voucher & Promotion Engine	L1	Admin tool to generate discount vouchers and promo codes with checkout redemption in the passenger app.		
FN-INT-01	Microsoft Entra ID SSO	L1	Single Sign-On (SSO) authentication for administrative and dispatch users via corporate Microsoft Entra ID.		

MODULE B: Statutory, Tax & Regulatory Compliance (Strict & Specific)

1. EU Platform Work Directive (Directive 2024/2831) & Swedish “Lagen om Plattformsarbete”

ID	Statutory Requirement	Tier	Detailed Legal Specification	Compliance (FC/PC/RD/CU/NC)	Vendor Delta / Technical Implementation
REG-PWD-01	Algorithmic Disclosures Portal	L1	In-app driver interface presenting automated written disclosures detailing algorithmic task allocation parameters, performance tracking, and rating impacts.		
REG-PWD-02	Human Oversight Console	L1	Administrative rule engine ensuring automated algorithms cannot execute driver account suspensions, financial penalties, or terminations without mandatory human dispatcher review and approval.		
REG-PWD-03	Decision Explanation & Appeal SLA	L1	Integrated ticketing console managing driver requests for explanations of automated decisions, tracking compliance against statutory review deadlines.		
REG-PWD-04	Offline Telemetry Hard Stop	L1	Enforced software block preventing location tracking or background data collection whenever the driver application is in an offline or logged-off state.		
REG-PWD-05	Arbetsmiljöverket Reporting Export	L1	Automated reporting module extracting platform worker counts, contract classifications, and operational conditions for Swedish authorities (Arbetsmiljöverket).		

2. EU DAC 7 Tax Transparency Directive (Directive 2021/514) & Swedish Skatteverket Reporting

ID	Statutory Requirement	Tier	Detailed Legal Specification	Compliance (FC/PC/RD/CU/NC)	Vendor Delta / Technical Implementation
REG-DAC-01	DAC 7 Identity Vault	L1	Secure storage capturing reportable driver data: Name, Address, Tax Identification Number (Personnummer/Organisationsnummer), VAT ID, DOB, and primary bank details.		
REG-DAC-02	DAC 7 Activity Ledger	L1	Ledger tracking individual quarterly consideration paid, completed trip counts, and Weride platform fee deductions.		
REG-DAC-03	Skatteverket DAC 7 XML Exporter	L1	One-click generator exporting annual platform tax data formatted strictly to official Skatteverket DAC 7 XML schemas.		

3. Swedish Transport & Fiscal Directives

ID	Statutory Requirement	Tier	Detailed Legal Specification	Compliance (FC/PC/RD/CU/NC)	Vendor Delta / Technical Implementation
REG-SWE-01	Prop. 2017/18:239 Audit Control Log	L1	Encrypted, tamper-proof pre-booking audit log recording pre-agreed pricing, route GPS coordinates, driver ID, and timestamps for taximeter-exempt operation.		
REG-SWE-02	Multi-Tier Split VAT Engine	L1	Automated calculation engine applying 6% VAT for passenger transport services versus 25% VAT for parcel/courier deliveries.		

ID	Statutory Requirement	Tier	Detailed Legal Specification	Compliance (FC/PC/RD/CU/NC)	Vendor Delta / Technical Implementation
REG-SWE-03	Fortnox/Stripe Accounting Export	L1	Automated transaction export routines feeding daily/bi-weekly sales and commission ledgers directly into Fortnox/Stripe accounting software, based on the payout cycle.		

MODULE C: Expansion Package (Level 2 Upgrade - "Next Level" Features)

ID	Requirement Area	Tier	Capability Description	Compliance (FC/PC/RD/CU/NC)	Vendor Add-on Cost / Comments
EXP-AI-01	Predictive Demand Heatmaps	L2	AI model overlaying historical trip density and local events to forecast high-demand zones.		
EXP-FLT-01	Automated Flight Tracking Sync	L2	Flight tracking integration to automatically update pickup times and dispatch alerts based on real-time flight delays.		
EXP-M365-01	Outlook Graph API Calendar Sync	L2	Automated conversion of executive Outlook calendar appointments into scheduled ride bookings via Microsoft Graph API.		
EXP-M365-02	Power BI & Teams Emergency Pipelines	L2	Continuous data pipelines feeding real-time operations into Power BI dashboards and routing panic triggers to Microsoft Teams channels.		
EXP-PAS-01	In-App Fare Splitting	L2	Passenger app feature allowing riders to divide trip costs with other app users during an active ride.		
EXP-DRV-01	In-app economy (driver and passenger app)	L2	Configurable in-app points and subscription economy enabling drivers and passengers to earn, spend, receive, or redeem points based on booking activity, demand, behavior, and subscription tier, with dynamic incentives, access privileges, rewards, and administrative rule controls.		

4. VENDOR GAP ANALYSIS & CUSTOMIZATION ESTIMATION WORKSHEET

(Mandatory for Option A Bidders addressing Level 1 gaps)

If your response includes requirements marked as **PC (Partially Compliant)**, **RD (Roadmap)**, or **CU (Custom Development)**, you must complete this worksheet to define the customization delta.

Requirement ID	Capability Gap / Description	Proposed Customization Solution	Estimated Hours	Estimated Cost (SEK / EUR)	Target Delivery Date
Example: REG-PWD-02	No human review step before account suspension.	Build a human review console into the admin panel before suspension executes.	35 hrs	€ 2,800	Nov 30, 2026

5. COMMERCIAL PROPOSAL & COST SCHEDULE

Vendors must state all costs in SEK (Swedish Krona) or EUR (€), excluding Swedish VAT, using a single consistent currency throughout the proposal.

Grey-shaded cells require vendor input. Pre-filled cells define Weride's requirement and should not be altered.

5.0 Commercial Terms & Assumptions

Price Validity: All pricing submitted in this proposal must remain valid and binding for no less than 90 calendar days from the Proposal Submission deadline (October 30, 2026).

Escalation on Recurring Fees: State your proposed annual escalation methodology for recurring fees below (e.g., fixed percentage, CPI-linked, or capped ceiling).

Escalation Methodology	Annual Cap (%)	Vendor Comments

Payment Milestones: Propose your standard milestone-based payment schedule against the One-Time Implementation Investment (Section 5.1).

Milestone / Trigger Event	Proposed % of One-Time Investment	Vendor Comments
Contract Signing & Kickoff		
Design / UAT Environment Sign-off		
Go-Live (Production Deployment)		
Post-Launch Stabilization (30 days)		

Exit & Data Portability: State one-time costs associated with contract termination, source data export, and transition assistance to a successor vendor.

Exit Cost Item	Cost (SEK/EUR)
Data Export & Migration Package	
Transition / Knowledge Transfer Support (per month)	
Source Code Escrow Annual Fee (Option B only)	

5.1 One-Time Implementation & Development Costs

Cost Breakdown Item	Option A: White-Label + Customization	Option B: Full Custom Build	Assumptions / Scope Included
Core Platform Provisioning & Branding Setup			
Driver & Passenger Apps (iOS & Android Release)			
Hotel Concierge, Carrier Management Portal & Supplier Portal Setup			
Regulatory Modules (EU PWD, DAC 7, Prop. 2017/18:239, Tax/VAT Engine Setup)			
Fortnox & Microsoft Entra ID Integrations			
L1 Custom Engineering Delta Total (from Section 4)			
Onboarding, Testing & Training Sessions			
TOTAL ONE-TIME IMPLEMENTATION INVESTMENT			

5.2 Recurring Platform Costs

5.2.1 Option A — SaaS / Commission Model

Active Fleet Size Tier	Fixed Base Monthly SaaS Fee	Monthly Fee Per Active Vehicle	Transaction / Booking Fee (If Any)
1 – 25 Vehicles			
26 – 100 Vehicles			
101 – 500 Vehicles			
501 – 1000 Vehicles			
1001+ Vehicles			

5.2.2 Option B — Hosting, Maintenance & Managed Support

Cost Item	Monthly Fee (SEK/EUR)	What's Included
Cloud Hosting & Infrastructure		
Platform Maintenance & Bug-Fix Retainer		
Managed Support / Helpdesk Coverage		
Security Monitoring & Patching		

5.3 Reference-Case Illustrative Total Cost

Reference Fleet Size: 150 active vehicles

Assumed Average Gross Booking Value per Vehicle per Month: [To be confirmed — e.g., SEK 45,000]

Cost Component	Monthly Amount (SEK/EUR)
Fixed Base Monthly Fee (SaaS or Hosting & Maintenance)	
Per-Vehicle Fee × Reference Fleet Size	
Transaction / Commission Fee × Assumed Bookings	
Illustrative Total Monthly Recurring Cost at Reference Fleet Size	

5.4 Level 2 Expansion Package Options (Phase 2 Add-ons)

Module ID	Module Description	One-Time Setup / License Cost	Monthly Maintenance (If Any)	Earliest Availability Post-L1 Go-Live
EXP-AI-01	Predictive Demand Heatmaps			
EXP-FLT-01	Automated Flight Tracking Sync			
EXP-M365-01/02	Advanced M365 (Graph Sync, Power BI, Teams)			
EXP-PAS-01	In-App Fare Splitting			
EXP-TAX-01	Digital Driving Log (Körjournal)			

5.5 Post-Implementation Customization & Support Hourly Rates

Engineering Role / Resource Category	Standard Hourly Rate (SEK/EUR)	Bundled Monthly Hours Included in Base Fee	After-Hours / Weekend / Holiday Multiplier
Lead Solution Architect / Technical Director			
Senior Backend / Mobile Developer (iOS & Android)			
QA / Integration Specialist			
24/7 SLA Emergency Technical Support Rate			

5.6 Multi-Year Commitment Discount Schedule

Commitment Term	Discount off Recurring Fees (%)	Notes / Conditions
1-Year (Baseline)	—	
2-Year Commitment		
3-Year Commitment		

5.7 Total Cost of Ownership (TCO) Summary — 1-Year / 3-Year

TCO Component	Option A (SEK/EUR)	Option B (SEK/EUR)
One-Time Implementation Investment (Section 5.1)		
Year 1 Recurring Costs (Section 5.3 × 12)		
Year 1 Total Cost of Ownership		
3-Year Recurring Costs (Section 5.3 × 36, net of Section 5.6 discount)		
3-Year Total Cost of Ownership		

6. VENDOR COMPLIANCE DECLARATION & SIGN-OFF

This page must be completed and signed by an authorized executive of the bidding vendor.

6.1 Vendor Details

- Legal Entity Name: _____
- Corporate ID / Registration Number: _____
- Registered Address: _____
- Primary Contact Person & Title: _____
- Email: _____ Phone: _____

6.2 Mandatory Regulatory Declarations

[] **Level 1 Baseline:** We confirm our proposal covers all Level 1 baseline functional and compliance requirements for launch.

[] **EU Platform Work Directive (2024/2831) & Swedish Law:** We confirm our platform complies with (or will be customized to comply with) all algorithmic transparency, human review console, and offline telemetry minimization requirements entering into force on December 2, 2026.

[] **EU DAC 7 Tax Directive:** We confirm our software supports driver tax data capture, activity ledgers, and Skatteverket DAC 7 XML generation.

[] **Swedish Transport Compliance:** We confirm compliance with Swedish Transport Agency audit log standards under Prop. 2017/18:239.

[] **Security & GDPR:** We confirm strict compliance with EU GDPR data privacy regulations and PCI DSS payment security standards.

[] **99.95% Availability SLA:** We guarantee cloud infrastructure architecture meeting or exceeding a 99.95% operational uptime SLA.
